*State wastes include waste oil (MA01), PCBs (MA02), and paint manufacturing waste (MA04).

Abbreviation Definitions:

LQG = Large Quantity Generator (2200 lbs. or more per month)

SQG = Small Quantity Generator (220-2199 lbs. per month)

VSQG = Very Small Quantity Generator (less than 220 lbs. per month)

B. Certification

I understand that the Department of Environmental Protection may inspect to verify our hazardous waste/state regulated waste status and I am aware that there are significant penalties for submitting false information. I further understand that I must notify DEP of any future change in our status and that this generator identification number is only valid for the above location. I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete.
